Calcium + D3 Tablets
as an contribution for the preserve of bones and teeth

Contains: 100 tablets

Information
This combination of calcium and vitamin D is a true classic for our bones since both vital substances contribute to their preservation. Vitamin D also contributes to our calcium metabolism. In addition, calcium plays a role in dental health since it is required for the preservation of normal teeth.

With one or two Calcium + D3 Tablets a day, you can make a valuable contribution to supplementing your calcium and vitamin D intake.

One tablet contains
400 mg calcium, 2.5 μg vitamin D₃

Ingredients
Calcium carbonate; bulking agent: cellulose; rice starch; stabilizer: gum arabic; release agent: magnesium salts of edible fatty acids; cholecalciferol, partially hydrogenated soybean oil.
